

Please take a few minutes and complete the following questions. Please give your township of residence so your responses can be forwarded to your township trustees.

Your Township of residence Licking

Do you believe control of mosquitoes and associated infectious diseases is a:

50% Minor problem 50% Moderate problem 50% Serious problem

What would be your personal prioritization of the use of your township's efforts/funds for the following abatement methods? (Prioritize by number)

60 pts. Larviciding (destroying mosquitoes before they hatch) by – Township purchasing materials and making it available to residents for personal use in mosquito breeding areas.

67 pts. Larviciding (destroying mosquitoes before they hatch) by – Township treating mosquito breeding areas, including private property.

77 pts. Providing education to residents about ways to reduce mosquito breeding.

36 pts. Adulticiding (destroying adult mosquitoes) by the use of pesticide spraying.

35 pts. Tire recycling program that would subsidize the cost of recycling tires.

Other (Please describe) Township should keep ditches clean and flowing

Does this problem warrant more restrictive zoning in your township to reduce the environments that commonly breed mosquitoes? 50% No 50% Yes

If your township would use pesticide spray to reduce the mosquito population, is it important to you to be notified? 7% No 93% Yes

If you answered yes to the above question, in what manner would you prefer to be notified?

38% Newspaper publication 33% Signs posted along roadways 29% Other*

Do you have any comments about this topic that you would like to share with your township trustees?

*Local radio notification

*Email notification

*Television notification

*Posting of notification on every door in area that is going to be sprayed
